

UNMATCHED DURABILITY...

Painted surfaces don't just come under attack from the sun's rays. They are also subjected to the rigors of everyday use, like wear-and-tear and damage from impacts and abrasion.

Perfection contains a polyester-urethane resin system that is chosen specifically for its outstanding durability and abrasion-resistant properties.

This means that the Perfection is ideal for use on:

- Decks*, cabin sides and topsides - resists everyday wear-and-tear
- Hullsides - resists scuffing from fenders, impact damage and resists attack by a variety of aggressive chemicals including fuel, oils, mild acids and detergents
- Masts - resists chafing and constant abuse

*Add Interdeck No-Skid 2398c when using on decks.

...AND BEAUTY

We know how much importance you place on the appearance of your boat. We also know that nothing has a bigger effect on your fellow boaters than the sight of beautifully painted topsides and superstructure...and that nothing makes you feel better than their admiring looks!

For this reason Perfection not only has a dazzling gloss, but also an exceptional Distinction of Image (D.O.I.) that is sure to gain their admiration.

Perfection's exceptional D.O.I. results from a combination of:

- Highest quality ingredients
- Superior flow out, giving you an exceptionally smooth, mirror-like finish
- Years of experience in developing and applying 2-part polyurethanes

FOR A PROFESSIONAL-QUALITY FINISH MADE EASY

THE ULTIMATE 2-PART POLYURETHANE GLOSS FINISH

- 1** Ultimate 2-part polyurethane gloss finish that is specially formulated for the Do-It-Yourselfer and professional alike:
 - Excellent flow delivers professional spray-quality finish by brush/roller application
 - Step-by-step instructions demonstrate how to achieve the very best results
- 2** Ultra-high gloss combined with longest lasting color and gloss retention:
 - Unique package of HALS/UV absorbers and the chemically-cured polyurethane resin system protect against premature ageing from the sun
 - Excellent color retention in a wide variety of colors from the whitest white to the deepest blue.
- 3** Exceptional durability:
 - Resists abrasion and provides prolonged protection on areas of highest wear
 - Resistant to fuel, oils, mild acids and detergents

HELP IS AT HAND

To ensure you achieve the best possible results with ease, detailed application instructions and health and safety advice on the use of Perfection is available wherever you look for it:

- read the label and leaflet that comes with the Perfection
- visit our web site yachtpaint.com
- play our Info CD video demonstration

Perfection

FOR A PROFESSIONAL-QUALITY FINISH MADE EASY

THE ULTIMATE 2-PART POLYURETHANE GLOSS FINISH

D.O.I. - DISTINCTION OF IMAGE

Distinction of Image is a measure of the clarity of the reflection in a coating's surface. It can be measured simply by placing a ruler perpendicular to the paint surface and reading off the scale in the reflection. The higher the number that is visible, the sharper and deeper the reflection. As you can see here, Perfection reflects the whole image of the ruler without any distortion.

Q LOOKING FOR PERFECTION?

A Perfection is specially formulated to make it easy for you to achieve a truly professional-quality finish yourself.

Professional applicators prefer using 2-part polyurethane paints because they give the ultimate high-gloss, long-lasting finish. But you fear applying a 2-part product yourself. Not sure where to start? That's understandable. **Fear no more!**

Perfection is designed to flow-out superbly, helping you as you brush and roll.

It delivers a truly glass-like mirror finish, with exceptionally high gloss. The result is so stunning that everyone will think it was applied professionally!

To make it even easier for you, Perfection is accompanied by detailed application instructions. They show you step-by-step, how to achieve a professional-quality finish that everyone will admire.

So now you can use the technology that the professionals rely on everyday...when you choose Perfection.

Perfection is the ultimate 2-part polyurethane gloss finish. It is specially formulated to give high quality results for the Do-It-Yourselfer and professional alike.

Using Perfection gives you:

- Ultra-high gloss finish with longest lasting color and gloss retention
- Longest lasting results as the unique package of HALS*/UV absorbers protects against UV attack and surface degradation
- Exceptional durability – prolonged abrasion resistance even on highest wear areas and resistance to fuel, oils, mild acids and detergents

Also available is Perfection Varnish. This is a clear varnish giving long-lasting protection for wooden surfaces

*HALS - Hindered Amine Light Stabilizers

Perfect result: Perfection-coated topsides showing the ultra-high gloss finish.

Q CAN I REALLY GET A PROFESSIONAL-QUALITY FINISH WITH A BRUSH OR ROLLER?

A YES, a professional-quality finish can be attained using Perfection because it has been specially formulated for ease of application using highly effective flow additives that help erase marks from the brush. It flows out to an exceptionally smooth, level mirror-like finish.

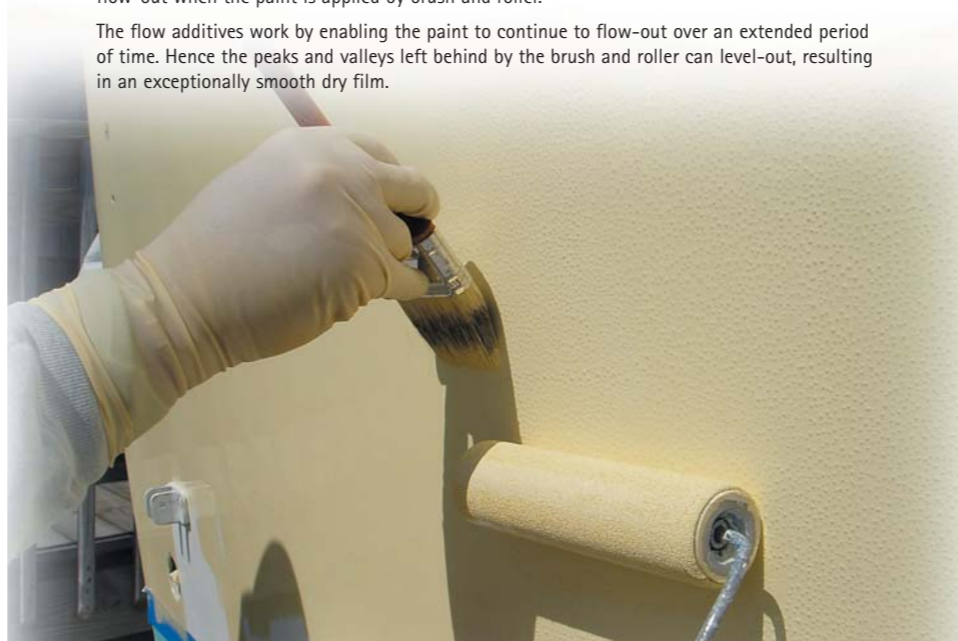

Q WHAT ABOUT ALL THAT MIXING AND THINNING WITH 2-PART PRODUCTS?

A Although thinner may be required in certain conditions, such as high temperatures or windy conditions, Perfection has been formulated to be able to use straight from the can and requires little or no thinning. Mixing is simple - 2 parts of base to 1 part of curing agent by volume - and at most temperatures you have 2 hours to use it once it has been mixed.

FLOW ADDITIVES AT WORK ▼

The special flow additives that Perfection contains have been selected to give the best possible flow-out when the paint is applied by brush and roller.

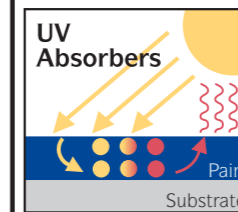

The flow additives work by enabling the paint to continue to flow-out over an extended period of time. Hence the peaks and valleys left behind by the brush and roller can level-out, resulting in an exceptionally smooth dry film.

FORMIDABLE PROTECTION AGAINST UV ATTACK

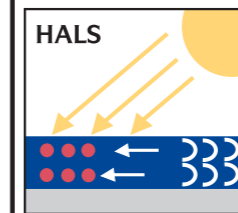

The primary benefit of Perfection is its outstanding longevity. It retains its gloss and color over many years and can last at least twice as long as many conventional enamels.

This is because its unique formulation contains a highly UV-durable polyester-urethane resin system and a sophisticated package of UV absorbers and HALS (Hindered Amine Light Stabilizers). They protect its surface from the damaging effects of the sun's rays by working together to neutralize the UV radiation.

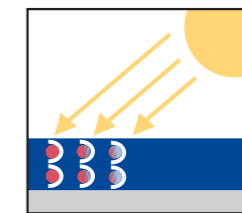

- UV absorbers soak up detrimental UV rays, neutralizing them by converting them to heat energy
- HALS protect the paint resin from the harmful effect of photochemically-produced free radicals by neutralizing them
- HALS are regenerated rather than being consumed during the neutralization process enabling them to neutralize further free radicals

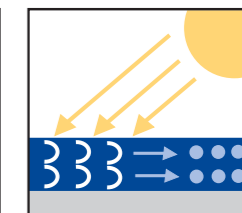

UV Absorbers convert UV energy into heat energy

1. The sun's rays produce harmful free radicals (red)

2. The HALS (white) attach themselves to the free radicals, neutralizing them

3. The HALS regenerate as the neutralised free radicals are released
